

ZuluCrypt and ZuluMount Combo

#####

Shitty OS : Parrot OS Linux ... Parrotsec.org

I do not like you fucking Zionists and Your Jew Gypsy Kike Nigger Fucking Shit on The TV/Radio/Sitcoms/MSM/Hellvision and people discussing useless trivial fucking shit that does not matter in any way shape or form whatsoever. Period. No one at all wants to hear the dick coming out of your cunt ass mouth about your TV Zionist Jew Shit that is the same kind of garbage as any other Statist or Liberal, you are same as those degenerates... You waste the same Tax Money as Welfare Fags... Your Car and House are a fucking liability, kill your kids. You are repeating useless fucking Zionist Jew ADL fucking information fucking die of VX Nerve Agent right now... Repremend from this Earth now and fucking off yourself already...

----- ZuluMount/ZuluCrypt Combo Crypt.

```
[user@parrot]~$ echo "teststring" | base64
```

```
dGVzdHN0cmduZwo=
```

```
[user@parrot]~$ echo "teststring" | base64 | base64
```

```
ZEdWemRITjBjbWx1WndvPQo=
```

```
[user@parrot]~$
```

```
$echo that will be password1+password2 when doing this crap shown here...
```

LUKS LVM

Luks LVM Install > no bootloader > no swap
> all user in boxes > English USA > sde/sdd

Combine with | base64 | base64 in Zulu...
Then the thing should do it correctly already.

su root/htop/f9

top/kill PID

Go in as root

**su root / cat -ne /dev/urandom | base64
>>1img-zulu.img**

sudo passwd root/usr

**fdisk -l sudo chmod -R 777 /dev/sdx
non root do echo >/dev/sdx**

**startx fdisk -l / gparted to check...
yes "~" >/dev/sdx**

ctrl+alt tty1-tty7...
